Maynard '62 is a natural follow-up to the Maynard Ferguson band's most successful album of the previous year, Maynard '61. Once again, Ferguson and his band have put together a cross section of some of the new music and arrangements the band will be featuring in '62. Once again the dynamic trumpeter and leader puts into practice his belief that the frequent addition of new music to the book of any band keeps the fire and enthusiasm of that band at its peak and enables it to communicate with the audience. This belief underlines the very nature and vitality of the Maynard Ferguson band and has been essential in gaining for them the tremendous success they now enjoy. Here then is a small part of what is in store for Maynard Ferguson fans and followers of big band jazz in 1962. It is really just the opener, just the beginning of the new musical direction the band will take. Nevertheless, this album is representative and remains, in essence, the spirit of... MAYNARD '62...
